Natural: 14, 17 & 28 mm

Coir is designed as a dirt and dust collector, suitable for most entrances including shops and public buildings which are subject to heavy foot traffic. An excellent brushing action helps protect existing carpets and flooring in an economical and practical way.

Traditionally used in busy entrance areas, often fitted into mat-wells or floor-recess.

With the optional addition of ramped rubber edging, Coir can also be converted into a loose-lay mat.
